JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Adsorbate
Application of surface analytical and modification techniques to biomaterial research 269
Adsorption
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
Alkanethiol
Probing the surface molecular structure in the UPS spectra of octadecanethiol and 1-cyclohexyl-12-dodecanethiol self-assembled on gold 55
APECS
Review: Auger photoelectron coincidence experiments from solids 1
Auger parameter
X-ray photoelectron spectroscopy of $Zn_{1-x}Cd_xSe$ thin films 69
Auger spectroscopy
Review: Auger photoelectron coincidence experiments from solids 1

Biocompatibility
On the biomedical relevance of surface spectroscopy 237
Biodegradable polymer
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227
Biomaterials
On the biomedical relevance of surface spectroscopy 237
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
Application of surface analytical and modification techniques to biomaterial research 269
XPS and SIMS surface chemical analysis of some important classes of polymeric biomaterials 285
Surface spectroscopic characterization of titanium implant materials 343

Carbon
Surface analysis of carbon and carbon fibers for composites 319
Carbon fibre
Surface analysis of carbon and carbon fibers for composites 319
Coincidence spectroscopy
Review: Auger photoelectron coincidence experiments from solids 1
Contact angle
Surface characterization of plasma deposited organic thin films 303

Electron beam
X-ray photoelectron spectroscopy of $Zn_{1-x}Cd_xSe$ thin films 69

Fluoropolymer
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227
Foreword v–vi
FTIR
Surface characterization of plasma deposited organic thin films 303

Gold
Probing the surface molecular structure in the UPS spectra of octadecanethiol and 1-cyclohexyl-12-dodecanethiol self-assembled on gold 55

Implant
Surface spectroscopic characterization of titanium implant materials 343
Interface
On the biomedical relevance of surface spectroscopy 237

K matrix
Mg $3p_jnd_{j'}$ ($j = 1, 3$) autoionizing series 33

Lubricant
XPS measurement of lubricant layer thickness on magnetic recording disks 79

Macromolecule
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
Magnetic disk
XPS measurement of lubricant layer thickness on magnetic recording disks 79
Measurement
XPS measurement of lubricant layer thickness on magnetic recording disks 79
Metals and alloys
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227
Multichannel quantum-defect theory
Mg $3p_jnd_{j'}$ ($j = 1, 3$) autoionizing series 33

Organic thin film
Surface characterization of plasma deposited organic thin films 303
Oxidation
Surface analysis of carbon and carbon fibers for composites 319

Perfluoropolyether
XPS measurement of lubricant layer thickness on magnetic recording disks 79
Photoelectron spectroscopy
Review: Auger photoelectron coincidence experiments from solids 1
Plasma modification
Surface characterization of plasma deposited organic thin films 303
Plasma technique
Application of surface analytical and modification techniques to biomaterial research 269
Polymer
XPS and SIMS surface chemical analysis of some important classes of polymeric biomaterials 285

Reactivity
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227

Satellite
XPS satellites in transition metal oxides 63
Self-assembled monolayer
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
SIMS
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227
XPS and SIMS surface chemical analysis of some important classes of polymeric biomaterials 285
Surface characterization of plasma deposited organic thin films 303
Spectroscopy
On the biomedical relevance of surface spectroscopy 237
SSIMS
Application of surface analytical and modification techniques to biomaterial research 269
STM
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
Surface
On the biomedical relevance of surface spectroscopy 237
Surface analysis
Surface spectroscopic characterization of titanium implant materials 343
Surface modification
Application of surface analytical and modification techniques to biomaterial research 269
Surface molecular structure
Probing the surface molecular structure in the

UPS spectra of octadecanethiol and 1-cyclohexyl-12-dodecanethiol self-assembled on gold 55
Surface preparation
Surface spectroscopic characterization of titanium implant materials 343
Surface properties
Surface analysis of carbon and carbon fibers for composites 319
Surface spectroscopic characterization of titanium implant materials 343
Surface structure
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227

TEM
Scanning probe microscopy of biomolecules and polymeric biomaterials 249
Thickness
XPS measurement of lubricant layer thickness on magnetic recording disks 79
Thin film
X-ray photoelectron spectroscopy of $Zn_{1-x}Cd_xSe$ thin films 69
Titanium
Surface spectroscopic characterization of titanium implant materials 343
Transition metal oxide
XPS satellites in transition metal oxides 63

UPS
Probing the surface molecular structure in the UPS spectra of octadecanethiol and 1-cyclohexyl-12-dodecanethiol self-assembled on gold 55

X-ray photoelectron spectroscopy
XPS satellites in transition metal oxides 63
X-ray photoelectron spectroscopy of $Zn_{1-x}Cd_xSe$ thin films 69
XPS measurement of lubricant layer thickness on magnetic recording disks 79
The determination of structure and reactivity at the surfaces of materials used in biology: needs and requirements for electron and ion spectroscopy for surface analysis 227
Application of surface analytical and modification techniques to biomaterial research 269
XPS and SIMS surface chemical analysis of some important classes of polymeric biomaterials 285
Surface characterization of plasma deposited organic thin films 303
Surface analysis of carbon and carbon fibers for composites 319

$Zn_{1-x}Cd_xSe$
X-ray photoelectron spectroscopy of $Zn_{1-x}Cd_xSe$ thin films 69
